### 5. General safety warnings

The release to children and minors is prohibited! Please keep this product out of reach of children and minors! This is not a treatment for nicotine dependence. If you want to wean of nicotine, contact your doctor or pharmacist.

In contrast to the consumption of tobacco cigarettes, no carbon monoxide or tar is inhaled when using e-cigarettes. Nevertheless nicotine is a toxic and highly addictive substance that can be absorbed through inhaling, swallowing or skin contact. Nicotine can increase the heart rat and/or blood pressure and cause headache, abdominal pain, drowsiness and/or nausea. Nicotine inhalation can reduce the efficiency of the respiratory system. Direct inhalation is toxic and causes permanent addiction. Nicotine increases the risk of infarction and high blood pressure. In rare cases, allergic reactions and respiratory tract irritation can occur after usage. The toxic effect of the product can lead to adverse health effects and affect lung function. The usage of the product is solely and exclusively at the user's own risk. If you notice any undesirable effects to yourself or to the people around you, discontinue use. Consult a physician if necessary.

If e-liquid comes in contact with your skin, wipe it off as soon as possible and wash the area of contact. If e-liquid enters your mouth, rinse it thoroughly with water. Also, if e-liquid comes in contact with your eyes, rinse them thoroughly with water.

If e-liquid is swallowed, contact your local poison control center. The Poison Emergency Call of the Charité University Hospital Berlin can be reached day and night by phone +49 (0) 30 - 192 40. In Austria, you can reach the 24h hotline of the Vienna Poison Information Center by phone at +43 (0)1 - 406 43 43. In cases of malaise, pain, dizziness or nausea after using the product, immediately contact a physician, if symptoms persist nevertheless, and call local emergency officials in cases of emergency.
